

Biznet Data Center Bali

RIMBA Jimbaran Bali Karang Mas Estate
Jl. Karang Mas Sejahtera
Jimbaran, Bali 80364 - Indonesia
Tel +62-361-8781688

Facility Overview

Biznet Data Center Bali offers high quality, reliable and scalable data center solution at the heart of Indonesia's paradise island. With the growing demand for better data speed and connectivity in Bali, this data center is located in a suitable location to host your disaster recovery center or travel & tourism-related application hosting.

With access to multiple carriers, it allows you to connect your mission critical application to your Head Office and Branch Office. The facility offers a Tier -2 Green Data Center with high quality, reliable and scalable solutions with 2N standard for power and N+1 for cooling systems. It is directly attached to the redundant Biznet Metro Fiber Optic Network supporting your 24x7 mission critical operation.

Biznet data Center Bali is located just 10 kilometers from Bali Ngurah Rai International Airport Denpasar, within Karang Mas Estate, a 77 hectares of integrated resort property in Jimbaran Bay with direct access to 2 award-winning resorts, Ayana Resort and Spa Bali and RIMBA Jimbaran Bali.
